Bug ID	Type	Feature	Description	Priority
1	Investigation	Factorial count for range from 171 to 991	Number between 171 and 991 gives result 'Infinity' and under Network tab in Response I get there is an actual calculated number so it's bug on FE side	High
2	Bug	Factorial count above 991	Numbers over 991 gives 500 error in console and no exception on FE side	Medium
3	Bug	Negative numbers	Negative numbers gives 500 error in console and no exception on FE side	Low
4	Bug	Terms and Conditions hyperlink	Terms and Conditions hyperlink to Privacy page	Medium
5	Bug	Privacy hyperlink	Privacy hyperlink to Terms and Conditions page	Medium
6	Bug	Copyright	I think that "© Qxf2 Services 2023 - 2023" should probably just be "© Qxf2 Services 2023"	Medium
7	Bug	Result for numbers above 21 is exponential number	Noticed different output in Network tab > Response section: Mozilla/Safari shows number with exponent (9.332621544394415 e+157) Chrome/Brave show whole number	Medium
8	Bug	Result for -0	The factorial result is 1 and expected is to say "Please enter an positive integer"	Medium
Step to reproduce isn't described in Gherkin I just make a list of bugs
